 Examiner's signature, if required

Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Concurred with Mr. Golian's argument in which Lourette reference did not teach one of the limitations "...receiving a command from a user to save the image data to the second location, presenting to the user an interface for selecting a format profile comprising a set of image data format settings..etc". Applicant expressed the invention is directed to selectable parameters for profile format based on the capability of the receiving of device, which can be set and reused rather than requiring the user to input the profile information with each forwarding of data. Further search will be conducted. .
